

## See what our clients have to say

Knackert Media has put my business in a higher category above my competition. Its user friendly interactive style allows my customers to be informed on our business before they even walk through the door. The popularity of our website also drives our google listing up to the very top! We don't pay google any extra for this, we just have so much website traffic. Our website has actually given us so much business, we struggle to keep up with it. My customers always compliment us on its looks and ease of use too. They are able to read about services, check prices, book an appointment, send us a message, inquire about bridal services, and even buy instant gift certificates. Without Knackert Media, our young new business would be still be struggling, but instead, we're thriving!!!

Angela Schulz  
Rockabetty's/Brideheads owner

Being faced with the task of branding our firm was a large undertaking. We spoke with a few large design firms, and none of them gave me us feeling of competency, intimacy and understanding when it came to my project — we felt like we were just another “To do” on their list.

This led us to Jeremy, where right from the start it was his goal to get inside our heads and understand what we wanted and needed, and how we wanted to be perceived. After a few back-and-forth discussions, Jeremy went to work, only to come back with a brilliant set of designs. We were happy that he was able to wrap himself around, and understand, our need for a minimalistic, sharp, and professional feel.

Additionally, it has been Jeremy pleasure to continually stay in contact with us ad assist in any modifications requested.

Needless to say, we couldn't be more pleased with the results. Thank you, Jeremy.
